Sina Mahmoodi

Front-End Engineer

mahmodi.sina.s@gmail.com | 09912033109 | sinamahmoodi.ir

SUMMARY

Front-End Engineer with professional experience building React applications and reusable UI systems. Skilled in TypeScript, Next.js, state management, API integration, responsive and accessible interfaces, and maintainable frontend architecture, across company environments and independent projects.

SKILLS

Frontend	React, JavaScript, TypeScript, Next.js, HTML5, CSS3, Tailwind CSS, Ant Design
State & Data	Redux Toolkit, React Query, Zustand, Context API, Axios, REST APIs
Practices	Component architecture, reusable components, responsive design, accessibility, code quality, RTL
Tools	Git, GitLab, GitHub, Figma

EXPERIENCE

Junior React Developer | Hooshmand Sepehr

- Built React-based internal applications, administrative dashboards and cheque management systems.
- Developed reusable UI components and data-heavy interfaces.
- Integrated APIs and improved the existing frontend architecture.

Junior React Developer | Chargoon

- Developed React features and implemented reusable components.
- Delivered frontend UI within an existing application architecture.

SELECTED PROJECTS

SafeSub – Subscription Marketplace

safesub.ir

Next.js, React, TypeScript, Tailwind CSS, Redux Toolkit, Axios, Django REST Framework

- Led frontend development of a customer-facing marketplace for digital subscriptions, using the Next.js App Router.
- Integrated product, category, subscription, authentication and profile APIs; managed cart state with Redux Toolkit.
- Built registration, login, checkout and profile flows with API error and loading-state handling.

SafeSub Admin Panel

Admin dashboard

Next.js, React, TypeScript, Tailwind CSS, Axios, Context API, Day.js (Jalali dates)

- Led end-to-end frontend development of an admin dashboard for products, orders, users and financial reports.
- Built product and order management workflows, plus sales and payment reports with data visualization.
- Implemented authentication, protected routes, a Persian RTL interface and a modular component architecture.

Cheque Management System

Enterprise application

React, TypeScript, React Router, React Query, Redux Toolkit, Zustand, Ant Design, Axios

- Developed enterprise dashboards, cheque workflows and financial/transaction reporting screens.
- Built reusable table and form components; implemented login with CAPTCHA and change-password flows.
- Managed sessions with Zustand and data fetching/mutations with React Query; handled validation and errors.
